Professional Summary

Full-Stack Developer who builds complete web applications with Python (Django, Django REST Framework), React and PostgreSQL, from architecture to server deployment. As the sole developer, I delivered a bilingual website with a custom CRM that is now in production, and an offline-first project management platform. I focus on security, performance and automated testing, and bring communication and active listening skills developed in high-volume customer service.

Experience

Full-Stack Developer — MBGH Luxury Cabinetry · Panama City Beach, Florida (remote) · 02/2025 – Present

- Built, as the sole developer, the bilingual (English/Spanish) website and a custom CRM with React, Vite, Tailwind CSS, Django REST Framework and PostgreSQL. In production over HTTPS since 09/2026 at mbghluxurycabinetry.com.
- Built lead capture with PDF blueprint uploads validated by extension, size and file signature, stored privately and downloadable only by authorized users.
- Implemented access control with 5 roles and per-action permissions (deny by default), session invalidation when users are deactivated, and inactivity logout synced across browser tabs.
- Developed a review system with an approval queue and a honeypot anti-bot filter, plus on-server English-Spanish machine translation (CTranslate2): 0.3 to 0.9 s per comment with no API cost.
- Ran a security audit with 27 findings (17 in code, 10 on the server) and applied the fixes: rate limiting, HTTPS/HSTS and SSH hardening. It closed with 0 known dependency vulnerabilities and 75 automated tests passing.
- Configured and deployed the VPS (Ubuntu, Nginx, Gunicorn with systemd, Let's Encrypt, UFW) and applied technical SEO with JSON-LD structured data and metadata in both languages.

Digital Services & Customer Service Technician — Lennon'Studios · Havana, Cuba · 10/2022 – 02/2025

- Served an average of 100 customers a day, identifying their needs and delivering the service quickly and accurately.
- Managed the transfer and organization of multimedia content across different storage devices.
- Edited, formatted and printed documents to each customer's specifications.

Photo & Video Editor — Lacuna Salón & Spa · Hialeah, Florida (remote) · 07/2022 – 09/2022

- Edited images in Photoshop and produced a video of the salon's work portfolio in Filmora, shown to customers on-site.

Junior Developer — CID-DCMTRANS · Havana, Cuba (remote) · 09/2021 – 04/2022

- Built an informational website with Drupal for the company's internal network, centralizing documentation from every department.
- Improved communication between departments: staff could look up current decisions and documents without requesting them through other channels.

Projects

Pizarra: offline-first agile project management platform — Thesis project for the company Código Creativo · Python, Django, PostgreSQL, Celery, Redis, Service Worker, IndexedDB, Tailwind CSS

- Built end to end a platform with Kanban boards, sprints, burndown charts, Git integration and auditing, replacing the manual consolidation of information across spreadsheets and chats.
- Implemented offline work with later sync and no data loss: batches of 100 operations processed in under 1 s.
- Reduced database queries per request from 428 to 11; the board responded in under 2 s with 25 concurrent users.
- Validated permissions for 6 roles across all 30 tested combinations, entirely on open-source software with no licensing costs.

“1+1=1” video podcast (in development) — Co-creator · 06/2026 – Present

- Wrote the proposal submitted to an international funding program, with a 12-month production plan and a USD 14,000 budget across 7 line items, for a video podcast focused on the inclusion and rights of people with disabilities.

Education

Computer Engineering (Ingeniería en Informática) — Technological University of Havana José Antonio Echeverría (CUJAE) · 2018 – Present

- Thesis defense scheduled for 02/2027; expected graduation 07/2027.

Courses — Udemy: Python, Django, React and JavaScript.

Skills

- **Backend:** Python, Django, Django REST Framework, REST APIs, PostgreSQL
- **Frontend:** React, Vite, JavaScript, Tailwind CSS, HTML, CSS, react-i18next
- **Servers & deployment:** Linux (Ubuntu), Nginx, Gunicorn, VPS, SSL (Let's Encrypt), firewall (UFW)
- **Security & quality:** token authentication, role-based access control, rate limiting, dependency auditing (pip-audit, npm audit), automated tests
- **Tools:** Git, GitHub, Postman, Google Analytics 4, technical SEO (JSON-LD), WordPress, Drupal
- **Media & office:** Photoshop, Filmora, Camtasia Studio, Excel, Microsoft Project, Visio
- **Interpersonal:** active listening, explaining technical topics to non-technical people, mediation, public speaking (talks to audiences of about 100 people and a TV interview on the program Saludarte, Canal Habana)

Languages

Spanish (native) · English (intermediate)

Volunteering

Volunteer Trainer — Community organization · Havana, Cuba

- Trained volunteers with no technical background to operate audio and video equipment, using a step-by-step guide I wrote; meetings no longer depended on a single person.
